

## **ATTACHMENT NO. 2 – ENVIRONMENTAL POLITICS**

The company LUX, spol. s r. o., deals with construction and production of special purpose machines and appliances, mostly for the electrotechnical and automotive industry. Our company understands the necessity of protecting the natural resources and the environment. We aim to keep improving the environmental profile of LUX, spol. s r.o. while developing our business activities. We want to establish environmental protection as our market advantage and create a positive impact on the others.

In accordance with our environmental politics, the management of LUX, spol. s r. o. pledges to observe the following:

Proceed in accordance with the current legislation and regulations for the environmental protection in all controlling and implementing activities.

Keep improving the environmental profile and maintain the implemented system of the environmental management by testing the set goals through internal audits, repeated checking of the system by the management and defending the obtained certificates.

Present the contents of the environmental politics to the employees of the company as well as to the business partners and the public.

We also pledge to:

Promote and implement production and assembly technologies and materials that help to minimize negative impacts on the environment.

Require environmental protection from our suppliers of materials and services.

Lower the energy intensity of the production and assembly and the amount of materials and additional tools through strict observing of the economic parameters and optimizing the logistic activities; increasing thus the competitive abilities of the company.

Minimize the negative impact of possible accidents.

Provide for a level of maintenance and operation of the individual objects that enables constant reduction of pollutants brought into the environment and the occurrence of inexploitable waste.

Use the system of education and motivation of the employees to improve the environmental profile, in accordance with environmental rules.
